Contents of Volume 14

Number 1, May 1975

ALAIN GLEIZE ET FRANCOISE CABANE-BROUTY. Solubilité et Diffusion de l'Argent dans le Sulfure de Cadmium 1

J. MULLER ET J. C. JOUBERT. Synthèse sous Haute Pression d'Oxygene d'une Forme Dense Ordonnée De $FeVO_4$ et Mise en Evidence d'une Variété Allotropique de Structure $CrVO_4$ 8

R. REISFELD, A. BORNSTEIN, AND L. BOEHM. Optic Characteristics and Intensity Parameters of Sm^{3+} in GeO_2 Ternery Germanate, and Borate Glasses 14

JEAN RAVEZ, RÉGNAULT VON DER MÜHLL, ET PAUL HAGENMULLER. Filiation Structurale des Phases Dérivées de $BaFeF_5$ 20

J. CHENAVAS, J. C. JOUBERT, M. MAREZIO, AND B. BOCHU. The Synthesis and Crystal Structure of $CaCu_3Mn_4O_{12}$: A New Ferromagnetic–Perovskite-like Compound ... 25

S. S. CHERN, H. R. VYDYANATH, AND F. A. KRÖGER. The Defect Structure of CdTe: Hall Data 33

S. S. CHERN AND F. A. KRÖGER. The Defect Structure of CdTe: Self-Diffusion Data ... 44

SUMIO IIJIMA. High-Resolution Electron Microscopy of Crystallographic Shear Structures in Tungsten Oxides 52

C. PICARD ET P. GERDANIAN. Etude Thermodynamique des Oxydes TiO_{2-x} à 1050°C ... 66

STEN ANDERSSON, CHRISTOFER LEYGRAF, AND TORSTEN JOHNSSON. The Structure of Defect Ru_4Si_3 78

ABDALLAH EL MASLOUT, MICHEL ZANNE, FRANÇOIS JEANNOT, ET CHARLES GLEITZER. Préparation et Structure d'un Polyphosphure de Magnésium: MgP_4 85

JEAN RAYMOND GAVARRI, GILBERT CALVARIN, ET DOMINIQUE WEIGEL' Oxydes de Plomb. II. Etude Structurale à 5 K de la Phase Orthorhombique de l'Oxyde Pb_3O_4 91

E. L. EVANS AND J. M. THOMAS. Ultramicrostructural Characteristics of Some Intercalates of Graphite: An Electron Microscopic Study 99

ABSTRACTS OF FORTHCOMING ARTICLES 112

Number 2, June 1975

J. CHOJNACKI AND R. KOZŁOWSKI. Disordered Modifications of Cobalt Molybdate 117

K. NASSAU, J. W. SHIEVER, AND B. E. PRESCOTT. Transition Metal Iodates. VI. Preparation and Characterization of the Larger Lanthanide Iodates 122

W. LAQUA. Zur Kinetik der Spinellbildung von β-Ga_2O_3 mit zweiwertigen Oxiden II. Tracerdiffusion von $^{63}Ni^{2+}$ und $^{67}Ga^{3+}$ im Nickel–Gallium–Spinell 133

J. P. DOUMERC, M. VLASSE, M. POUCHARD, ET P. HAGENMULLER. Synthèse, Croissance Cristalline, Propriétés Structurales et Physiques d'un Nouveau Tungstate +V d'Aluminium $AlWO_4$ 144

JEAN-CLAUDE JUMAS, ETIENNE PHILIPPOT, ET MAURICE MAURIN. Etude Structurale de $Na_4Sn_3S_8$. Evolution de la Coordination de l'Etain dans le Système Na_2S-SnS_2 152

M. ZANNE, C. GLEITZER, ET J. AUBRY. Sur le Système $BaFeO_{3-x}$–Bi_2O_3 160

EUGENE F. JENDREK, JR., ALAN D. POTOFF, AND LEWIS KATZ. A Single-Crystal Study of Barium Tungsten Lithium Oxide: a Compound with a Ten-Layer Structure 165

C. MAX, G. LE CAËR, ET B. ROQUES. Etude des Propriétés Magnétiques de la Variété Monoclinique du Monogermaniure de Fer 172

G. BLASSE. Influence of Local Charge Compensation on Site Occupation and Luminescence of Apatites 181

I. J. MCCOLM, R. STEADMAN, AND C. DIMBYLOW. Phase Equilibria, Thermal Analysis, and Reactivity of Tin Tungsten Bronzes and Related Phases 185

TERENCE C. GIBB, ROBERT GREATREX, NORMAN N. GREENWOOD, AND KENNETH G. SNOWDON. A Study of the New Perovskite Solid Solution Series $SrFe_xRu_{1-x}O_{3-y}$ by Ruthenium-99 and Iron-57 Mössbauer Spectroscopy 193

J. M. VANDENBERG AND D. BRASEN. Structural Behavior of the Ferromagnetic Spinels $Al_xMo_2S_4$ and $Ga_xMo_2S_4$, Containing Tetrahedral Clusters of Molybdenum Atoms 203

G. A. EMELCHENKO, L. N. DEMYANETS, AND A. N. LOBACHEV. Hydrothermal Crystal Synthesis in the $Ho_2O_3(Yb_2O_3)$–GeO_2–KF–H_2O Systems 209

ABSTRACTS OF FORTHCOMING ARTICLES 216

Number 3, July 1975

KENJI HIRAGA AND MAKOTO HIRABAYASHI. Crystal Structure of Vanadium Suboxide $V_2O_{1\pm x}$ 219

PETER KUNZMANN AND LEROY EYRING. On the Crystal Structures of the Fluorite-Related Intermediate Rare-Earth Oxides 229

J. M. HASCHKE. Structural Relationships, Crystal Chemistry and Anion Substitution Processes for $M(III)X_3$ Systems of the Lanthanides and Actinides 238

PATRICK DOUGIER, JOHN C. C. FAN, ET JOHN B. GOODENOUGH. Etude des Proprietes Magnetiques, Electriques et Optiques des Phases de Structure Perovskite $SrVO_{2.90}$ et $SrVO_3$ 247

T. J. ISAACS AND J. D. FEICHTNER. Growth and Optical Properties of $TlGaSe_2$ and β-$TlInS_2$ 260

J. G. ALLPRESS, H. J. ROSSELL, AND H. G. SCOTT. Crystal Structures of The Fluorite-Related Phases $CaHf_4O_9$ and $Ca_6Hf_{19}O_{44}$ 264

MICHEL POUCHARD, JEAN-PIERRE CHAMINADE, ANNIE PERRON, JEAN RAVEZ, ET PAUL HAGENMULLER. Influence de Divers Types de Substitutions Cationiques Sur Les Propriétés Diélectriques de Niobates de Structure "Bronzes Oxygénés de Tungstène Quadratiques" 274

LUC TRICHET, JEAN ROUXEL ET MICHEL POUCHARD. Sur les Propriétés Électriques et Magnétiques des Phases M_xZrS_2 (M = Fe, Co, Ni) 283

SHIGETOSHI MURANAKA AND TOSHIO TAKADA. Magnetic Susceptibility and Torque Measurements of FeV_2S_4, FeV_2Se_4 and $FeTi_2Se_4$ 291

S. S. CHERN AND F. A. KRÖGER. Chemical Self Diffusion in CdTe 299

. Mayer, E. Fischbein, and S. Cohen. Apatites of Divalent Europium 307
K. S. V. L. Narasimhan, M. J. Klein, and R. A. Butera. Low Temperature Heat Capacity and Magnetic Studies on $DyCu_5$ 313
Abstracts of Forthcoming Articles 317

Number 4, August 1975

Jean-Claude Jumas, Etienne Philippot, Francoise Vermot-Gaud-Daniel, M. Ribes, et Maurice Maurin. Etude de la Tétracoordination de l'Etain dans Deux Orthothiostannates: Na_4SnS_4 et Ba_2SnS_4 (α) 319
D. Bernard, J. Pannetier, et J. Lucas. $Hg_2M_2F_6S$ et $Hg_2M_2F_6O$: Deux Nouvelles Familles de Pyrochlores contenant du Mercure et des Metaux **M** de Transition Divalents 328
C. Chaumont, A. Daoudi, G. Le Flem, et P. Hagenmuller. Préparation, Propriétés Cristallographiques, Magnétiques et Electriques de la Solution Solide $Ca_{2-x}Y_xMnO_4$ 335
P. H. Bottelberghs and E. Everts. Charge Carriers and **dc** Polarization Phenomena in Solid Na_2WO_4 342
I. Okońska-Kozłowska, D. Konopka, M. Jelonek, J. Heimann, J. Pietkiewicz, and A. Chełowski. Preparation of the $HgCr_2(Se_xS_{1-x})_4$ Type Compounds and the X Ray Control of the Process of Formation of their Spinel Structures 349

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Contributions in Russian are acceptable, but they will be translated into English before publication. Manuscripts should be submitted to the Editor (M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member of the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lower-case italic letters (^{a}, ^{b}, ^{c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $15.00 for up to 98 pages of standard-size or 48 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

Supplementary material has been deposited as Document No. NAPS ..... with the National Auxiliary Publications Service, c/o Microfiche Publications, 440 Park Avenue South, New York, New York 10006. A copy may be secured by citing the document number and by remitting —— for photocopy or $1.50 for microfiche. Advance payment is required. Make check or money order payable to Microfiche Publications.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × 28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after a reduction of 50%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. Each figure should be identified on the back with the author's name and the figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten, with an Arabic number if necessary for reference placed in parentheses to the right of the equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The
references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation
in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number,
and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of
Chemical Abstracts' Service Source Index. For book references, give the author's name, name of book (in quotes),
Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year
of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for
reprints. There is no page charge.
